Ambien and Weed Combo 8/7/05

9:15 T Minus 0 minutes starting now

T:00 Ate First 10 mg of Ambien. I plan on smoking a little nug in about half an hour or so and then eating 20 more mg of Ambien at around 11. Stomach is slightly filled, ate maybe an hour or so ago. No initial effects noticed.

T:13 I feel some slight anticipation of some sort, visual distortion to the most mild degree, and an over all feeling of “off-ness”.

T:17 Mild stoned feeling more pronounced. No real visual distortions though my field of vision is slightly off. Thought pattern is somewhat off, I keep on thinking in much more complex terms and shit seems to go on for longer. Time distortion noticed, noticed to the slightest degree that is. I would say this has successfully reached a +. I’m slightly disappointed at the way in which I’m writing this. It gets the message across but I loose out on writing possibilities, i.e. with this style I am forced to relay the facts. Maybe when I toke the first little nug in about fifteen minutes I will be at a more preferred level of intensity.

T:22 I am going to go and blaze the first nug within the next ten minutes.

T:27 Smoked half of initial first bud. I think I will smoke the next half in the next ten or so minutes. Not super intense but very pronounced THC effects, drowsyness or stonyness feeling slightly heavier than usual, visual field is still somewhat standard. No real distortion noticed. Slight patterns in the air and ripplings in dark surfaces but nothing remotely surprising or out there. Those effects won’t be expected until later. Off to finish rest of nug.

T:31 THC effects much more pronounced now, after completion of the third bowel. Over all high has now reached ++, however I attribute most of it to the weed. There is a definite vibe or undertone that I don’t recognize, and I attribute that to the Ambien. Perhaps it is starting to
take a little more attention. I think I am going to lie down for the next hour and decide weather or not to eat the rest of the Ambien at 10:30 or 11. I think I will, but right now my high is reaching some intense heights and I want to go see if this Ambien has distorted my visual field to any significant degree. My sentence seem to be growing longer and my memory is progressively getting fucked.

T:39 High is definitely pushing +++ but not quite there. I am very stoned and mentally high at the same time, one of the unique qualities I give thanks to the Ambien for. The Ambien is providing increased visual sensations that aren’t quite out there but definitely apparent. I am eager for it to be 11 so that I can consume the rest of the Ambien. I think the Ambien effects are becoming more pronounced every second because I can feel a new feeling slipping over my brain like a soft glove emerging from the depths of somewhere every fucking second. Thoughts and sentences seem to weve themselves together until they’ve woven a vast river of words. My process is completely screwed. Maintence is reaching the max. I am stoned. I am incredible high. I would like to get with a girl, most preferred would be Sarah, then Lily I guess. YO I AM so FUCKING HIGH. I am gonna lay down and look at shit. Maybe I’ll draw. I’ll catch you back in a while.

T:55 I am extremely high in all possible ways. My visual field isn’t as distorted as I wished it would be but mentally and certainly physicly and almost auditorily I am completely fucked. I find it very difficult to type. Every sentence is taking ages to complete (like the pyramids except those fuckers were built by slaves and these sentences are only made by the reachings of my mind and the pounding of my fingers on this key board) damn those sentences that are horribly put together and go on for ages. I am sorry. Like I said, I am extremely high. It is only ten 08 and I am extremely fucked. I humbled by the power of this combo. I am especially humble at the thought of eating two more and toking another large nug. Maybe I’ll save some for tomorrow as an after crew pepper upper. That sounds like a good thought. Well I’m out for a while I have business to attend to.

T130 I just downed my second Ambien and readied some marijuana for consumption. The Ambien has taken on much more of an active roll. She if performing wondrous things with the computer screen making it seem as if the sentences are rippling or shifting. Yes there is lots of shifting. I will smoke in about ten minutes I want this second Ambien to catch on a little. I can already feel it starting to work on me. Once I really notice the effects, I’ll load up a bowl, and toke away. I’m out for now. Peace

T:10 55 it is 10 55

I believe the Ambien are starting to work hand in hand now. Everything is intensely weird and phychedilic. I have to piss. This is intense and crazy and I lovveee it. too the max. I’m gonna go piss and that should be interesting. Then ill sit down and write a little about what ever I can think of, and then I’ll prob go and enjoy a jolly toke and some smoke. Then the real fun begins. I am about to consume one MASSIVE truly massive hit my freind this one is a wallopperr, and the ambien haven’t finished coming on I am GONNA BE AT THE MOOON TONIGHT.

T 11 35 after ingestion of the third pill I am left with this strange feelinf that I am nothing but
a bug being swasojl I wish I could wright now but my friends are in trouble. I mst leave. I am sorry. Farefsllll,,
T time is 11 35
I ate three Ambien
All together
I believe.
I will check the box in a little while. I still have some crumbs I set aasie that we can do later yeah
That might be night of you fo drp down and not have a foff don dong yyoyodododojdojdoc
Dkod
This is very intense as you can see. What I advise one to do is re read this document while on
Ambien and I guenatteee u that it is amazzinggggggggggg thank you and goodddd BYU until the
next uh sighn in in SDFshould be soo
T: about fifteen minutes till twelve o clock. I have eaten three Ambien and havoc is being wreked
everywhwere. I was walking back to my computer and I saw voices and boides all over my room
and I just though to my sell that its all right and they wer still there to some extejt, I landed right
in his back yeard the nest dayl. Escuse me let me get to bueiness mess. I am extrely high. I think
I was planning on smoking some small crumlss. Then I am going to go do whatever comes to ones
minds. Thank you for your patience.
T:it is 10 till 12 o clock at night. My drug count is at pot lots Ambien three. the ambein have
made their presence verrrryy notciblee. Thee weed is hanfinin on for a ride. I think a little weed
in about ten minutes should wet the dar quite nicly. Thtas our pla, wet twtthe dart not the quill.
I feel determined. I am going smoke some more. Peace pal
T12 4 I think we toked some pot and I’m correct to remember it has made evry one really high,
after this senten I will make no more nasense, I just wont be able to manage to be sensible now

But yes I am extremely high easily +++ maybe a ++++ its pushing a four I’m telling you and if I find more bud to smoke it just might hit her baby. Its already banging on her doodrs as we speak. Alright. I’m out

I need too look at large things
In small spaces.

PEACE
I just feel aslsep on my desk. Something never hapepend before.

I’m gonna go explore this drug.

Enough of this

Maybe ill contact you later

Peace
8/8/05

Ambien can always count on giving me a good surprise. The next day I woke up with this vague memory of something incredible and amazing happening the night before, I just can’t quite put my finger on it. I woke up this morning and re read what I had written and I swear that I can’t remember writing anything after “T time is 11 35”. 

Last night’s trip was indeed amazing. While talking to a friend online I was convinced that there were other people apart of the conversation, and you can see in some of my notes how I mention “we are” and use pronouns for his and her. The feeling that there are other people there is extremely real, and at times I thought I could see them, strewn out on my couch, lying on my floor, all motionless but emanating powerful vibes.

This wasn’t as intense or physically extravagant as a DXM trip or nearly as visual as Shrooms. One of my cannabis trips I experienced during the beginning of the summer I still consider more intense than this Ambien trip, but the point is that while on Ambien I am allowed to see the world differently. Weed definitely made all the difference, propelling the already screwy Ambien consiousness into depths that I haven’t reached before. Everywhere I looked things were shifting and crawling with life. When I would stare at my computer screen absolutely hellbent on dicifering what was written in the AIM box, I could of sworn that my desk was warping towards the computer and that the screen was growing the larger, all the while huge “blobs” of mass were warping all around my “peripheral vision” field. It was an intense and horribly strange journey, one which I’ll relive soon.
